

## Health Protocol

- Precise information from the principal is sent to the whole educational community on the action to be taken.
  - o Inform all staff and parents of students outside China of the obligation of quarantine on return to China strictly following the instructions of the Chinese authorities on the date of return
  - o Anyone from abroad who has recently joined Beijing should :
    - Have been in quarantine for 14 days
    - Having no symptoms
    - Have been tested with COVID-19 and have a negative result.
  - o Anyone who has undergone medical treatment other than for chronic diseases must :
    - Submit a medical certificate certifying total recovery
    - Request permission from the principal to return to the school.
- Prohibition to any person other than staff and students from entering the school.
- If a visitor is required to enter the school, he or she must register and be accompanied by a guard to the place and the person of the high school concerned, then accompanied during his presence at the high school and then escorted out of the school.
- There is an outdoor area in front of the school for parents accompanying their children.
- If a pupil or staff member presents symptoms of fever (greater than or equal to 37.3°), cough or if he has respiratory difficulties, he does not report to the school and must inform the management immediately. In case of misrepresentation, the student's family or staff will be held responsible by the authorities Chinese. The school health department must regularly monitor the health status of the said and inform in real time the Chinese health service and the educational commission of Chaoyang about it and Beijing if the result is positive for VIDOC-19.

- For all high school entrants:
  - o For students, strict control of required documents in printed form
  - o Strict identity control of any person outside the establishment
  - o Presentation of the Health Kit for all staff and visitors
  - o Temperature measurement mandatory for all
  - o Wearing of the compulsory mask (issued by the families for students and the school for staff), except for kindergarten students
  - o Respect of safety distances between people (1m)
- Inside the school:
  - o Wearing of the mask is compulsory in all indoor communal areas and optional in the spaces external
  - o Regular hand washing and disinfection
  - o All areas are equipped with liquids for washing and disinfecting hands.
  - o For all levels and in all spaces outside the classroom, a distance of one meter between persons is mandatory
  - o Any movement out of the class must respect the marked traffic routes.
  - o During recess, students move to designated outdoor spaces in accordance with the distance of one meter between persons; if distance is not possible, the mask must be worn intrinsic
- School Transportation :
  - o Wearing a mask is mandatory for all (except for kindergarten students)
  - o For students, strict control of the documents required in printed form for boarding the bus
  - o For staff, mandatory presentation of the Health Kit

- **If a case is suspected (fever greater than or equal to 37.3°C/cough/respiratory difficulties) :**

Students arriving by bus are met separately from students arriving by their own means, by a specific temperature control and circulation circuit.

- o On arrival at the temperature control at the entrance of the school:

- If the temperature is strictly below 37.3°C, the student can go to his zone of gathering.
- If the temperature is equal to or greater than 37.3°C, a further temperature check at the mercury thermometer is performed:
- If the temperature is strictly below 37.3°C, the student can go to his or her area of gathering.
- If the temperature is 37.3°C or higher, the student is then taken to the room of isolation near the infirmary. The appropriately equipped nurse rechecks and depending on the temperature, takes measurements to return home or to a transfer to the authorized hospital as described above. If this student comes from a bus, every students and bus staff are gathered in a separate area from the other students
- In the latter case, the Chinese and French authorities are informed.

o Temperature check at midday :

- A temperature check is carried out for all students at the entrance of the restaurant school.

o During a class or at break :

- The teacher calls the nurse, the student stays where he is and the nurse protected by security equipment comes to pick him up and take him to the confinement
