

MATERNELLE

ACS

Lycée Français International
de Pékin

“

Les ACS sont des activités essentielles de la vie de l'établissement. Elles contribuent à l'excellence de l'éducation à la française,

Les activités sont ouvertes à tous les élèves scolarisés au Lycée Français International Charles De Gaulle de Pékin de la Moyenne section à la terminale.

Ces temps périscolaires représentent des moments éducatifs forts qui contribuent au développement et à l'épanouissement des élèves.

Les ACS proposent des activités diversifiées et de qualité permettant à ces derniers de découvrir des thématiques aussi variées comme la culture, le sport, le développement durable ou la citoyenneté.

”

- 6** Baby tennis
- 7** Football
- 8** Kung Fu
- 9** Gymnastique
- 10** Théâtre

Multi-activités

Sommaire

Intervenants: Wanmei, Zéro distance, So fun

Projet : Toute l'année, 3 Activités sont proposées, éveil musical, théâtre et activités manuelles. Les enfants seront partagés en 3 groupes et participeront aux 3 activités. Un intervenant parlant français est toujours présent lors de chaque activité.

Activités manuelles :

La maternelle est la période privilégiée pour les activités manuelles en tout genre, les enfants adorent manipuler, créer et découvrir les activités d'apprentissages comme le dessin, la peinture, collage, coloriage etc...

Éveil musical:

L'objectif de cet Atelier, c'est partir des rythmes différents pour éveiller, la créativité qui existe en chacun de nous...

Théâtre:

Un espace de liberté et d'expression où l'on accompagne les enfants dans leur imaginaire. Notre pédagogie n'a pas pour but de faire rêver à l'enfant de devenir une star, mais de le faire parler de ses rêves !

Lego education

Lego encourages learning through play.

Hands-on, engaging explorations with colorful LEGO® DUPLO® bricks ignite natural curiosity and foster a love of discovery and investigation, while playful faces, storytelling activities, and collaboration-based lessons help the youngest students develop social and emotional skills that set them up for a lifetime of successful learning.

Early math and science: Children naturally sort, count, and classify, while LEGO bricks provide a hands-on way to explore numbers, shapes, and colors as kids construct and deconstruct their creations. During the LEGO Education class, students develop problem-solving skills through play-based scenarios, and explore how things work through physical interactions and storytelling. LEGO is all about forming social and emotional skills through self-regulation, group play and idea sharing, while the difficulty of each task increases throughout the school year.

Baby Coding

Intervenant: Young Coding Academy

Through interactive learning through play with LEGO Spike, Bee-Bot and Sphero Jr., Little Coders will embark on a journey of creativity and learning. Our teachers will guide them every step of the way, ensuring a delightful and enriching learning experience, fostering a love for STEAM learning.

- With our LEGO Spike curriculum, students will build and bring their designs to life, fostering imagination and engineering skills. They will learn to follow instructions from icon and word-block coding based on Scratch, with tools especially designed for their age, that will inspire natural curiosity and encourage learning through play.
- Bee-Bot adventures will teach directional concepts and logical thinking, enhancing problem-solving abilities in Maternelle students. Guiding the Bee-bot through various challenges, Kids will learn the importance of sequences of accurate instructions and simple loops, while having a buzzing good time.
- Through play with Sphero Jr., Little Coders will explore early coding concepts, such as cause and effect, pattern recognition and setting direction to honing their ability to control and command their robot companion. They will be using tablets to connect their Sphero Jr. robot and customize its behavior with simple yet powerful programming blocks. Throughout this module, kids will learn block programming to set the movements of their robots to create mazes and solve puzzles.

Eveil musical

The benefits of music are truly transformational. When paired with movement and instrument play, it creates neurological magic, lighting up a child's brain and positively impacting all areas of development.

In our Eveil musical class, students are welcomed in a playful and nurturing environment where they sing, move, play instruments and listen to stories, all while developing their social skills, problem-solving skills and a foundation of reading. Our research-based curriculum focuses on whole-child development and boosts their musical, cognitive, and social development.

Our activities include greeting, story time and instrument play, which are strategically placed for maximum engagement. We use repetition and expansion of the curriculum, which acts like language-stimulation and creativity boost. Our approach to music education primes children for success in school and in life!

Sommaire

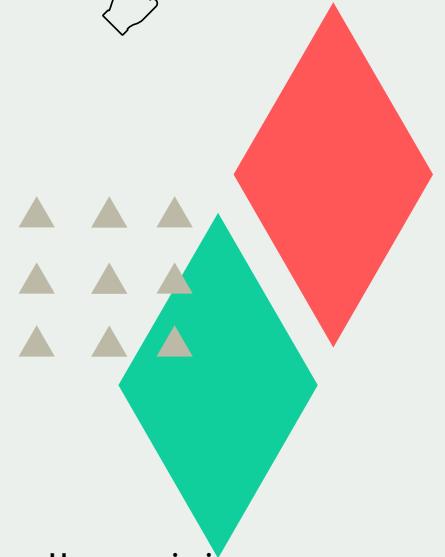

Céramic art

Sommaire

Intervenantes: Pang Guoli, Li Linrong

Learning how to make a ceramic, hand-forming, as well as gaining an appreciation of the history of ceramic arts. Created your own interesting shape and design the Parten, to get the inspiration from the natural.

陶艺

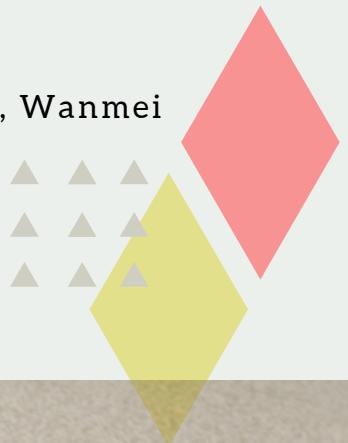

学习如何制作陶泥，手工成型，通过对历代陶艺作品的欣赏，创造自己有趣的造型和图案设计，并从大自然中获得灵感。

Tennis

Intervenant: Léo, Wanmei

Baby Tennis

A new adventure for active toddlers

Baby tennis is the perfect, age-appropriate introduction to tennis. Our play-based curriculum and specially designed equipment sets up pint-sized players for ultimate success, both on and off the court.

And because building fine and gross motor skills is particularly important for this age group, we structure every lesson to work on grasping, grabbing, large muscle movements as well as balance, whole body coordination, and basic athletic skills. Throughout the school year, the students will begin to build basic skills like throwing, catching and hitting. Don't be surprised if you see a big boost in confidence, too!

We use smaller, size-appropriate racquets, larger and low-compression balls and smaller nets to make the game more accessible, engaging and fun!

Football

Sommaire

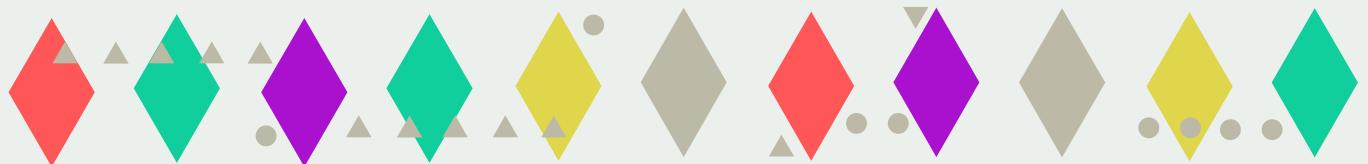

La Kidscool International Football Academy (KIFA), première académie française de football à Pékin pour les jeunes est heureuse de pouvoir mettre à disposition des élèves du LFIP ses compétences, son savoir-faire et son expérience dans le domaine du football auprès des jeunes.

Cette activité est animée par Philippe RICHARD (enseignant au LFIP - animateur sportif et fondateur de la KIFA).

Notre mission est :

- de faire découvrir, ensemble, le monde du football aux jeunes débutants,
- de permettre aussi aux plus avancés de se perfectionner
- et à tous de se faire plaisir au travers d'exercices ludiques et de matchs amicaux.
